REMARKS

25X1

1. A Soviet Air Force bombing range was observed in the Tiefensee (N 53/V 17) - Wiesow (N 53/V 17) area on 23 November 1950. An aircraft wreck was in a large and badly destroyed wooded area. It was surrounded by a circle of brushwood and stones about 30 to 40 meters in diameter. The circle was whitened with chalk so that it could be seen better from the air. The bomb craters indicated that the bombs had hit just at the side of the target wreck. It was noticed that the large and deep craters were beside the target and the small craters on the edge of the circle.
2. Woodsmen said that jet fighters have repeatedly fired rockets which did not always hit the target thus making the surrounding woods rather dangerous. \*

\* ☐ Comment. The presence of the bombing range was previously reported ☐  
The bombing range was formerly used by the bomber units stationed in Werneuchen and Strausberg. The fighter regiments stationed in Finow apparently conduct practice there also. For sketch showing layout of bombing area, see Annex.

1 Annex: 1 - sketch on ditto.
